Technology for Next Generation Class Rooms

Smarter Class Room

Smarter Features

Smarter Conference Room

The document camera or visual presenter is a new and powerful technological tool that allows, in real time, the digitalization of the camera framed objects.

The powerful software allows you to make notes, highlight, delete, or make special focus & save the document etc.

Ideal for presentations and for teachers who wish to enrich their lessons and make them more interactive, attractive and interesting.

The captured images can be saved in image files or popular video formats and can be stored, depending on the model, directly to your computer or SD Card.

The presence of a flexible swivel arm and a backlit base allows the display of particular objects that are not easily accessible or viewable.

It is used in the classroom, in relation to the digital whiteboard allows the simultaneous visualization of all the documents and scanned objects.
